About Me

I develop websites that function smoothly across desktops, tablets, and mobile devices. I create and style web pages with focus on clarity, usability, and visual balance. I design, refine and organize layouts in Figma to ensure a logical flow for users. I test and adjust designs to maintain consistent appearance across different browsers. I troubleshoot, improve and update website elements for better performance and user experience.

Education

- Datta Meghe College of Engineering
  Bachelor's of Engineering. | CGPI - 7.58
  2021- Present
- Shivaji Higher & Secondary College
  Bachelor's HSC. |Percentage: 82.93 %
  2018 - 2020
- Lourdes High School
  SSC. |Percentage: 79.20 %
  2008 - 2018

Additional Skills

- Web Design: Designed simple, responsible web pages using HTML,CSS and basic UI/UX
- Graphic Design: Knowledge of colors, Typography, layout and visual Design principles
- Marketing Exposure: Assisted Marketing team with branding, Content design, Social media creatives and basic campaign support
- Social Media: Experience in content creation, branding visuals, trend awareness and platform features.

Internship

Miraeko Infotech (Formerly Exigirtech Enterprises)
Design Intern **Oct 2024-Jan 2025**

LI designed materials for real-time client projects & applied UI/UX skills to enhance website experiences. Additionally, I collaborated with the marketing team, gaining hands-on exposure to digital marketing. These experiences helped me integrate design with user-centric solutions while strengthening my overall professional skill set.

Technical Summary

- **Web Technology**
  - **HTML:** structure of the page
  - **CSS:** Styling And Layout
  - **JavaScript(Basic):** Interactivity
  - **UI/UX:** Designing page that improves user experience
- **React js**
  - Strong understanding of React fundamentals & component-based architecture
  - Knowledge of Props for data passing & State management using useState
  - Basic knowledge of React Router for navigation
- **SQL**
  - Good understanding in RDBMS concepts
  - Comfortable in writing SQL Statements like DQL, DDL,DML etc.
  - Implemented Joins & Subqueries.
- **Java**
  - Good knowledge of strings, singleton design pattern & javabean.
  - Good in Exception handling & written custom exception.
  - Good practical knowledge of Collection-Framework & Data Structure like List, Set, Map & Queue etc.

Projects

- **ATM Stimulator System**
  Tech Stack: Java(Swing), MYSQL, AWT
  I developed a desktop-based Bank Management System using Java Swing, AWT, & MySQL, which manages ATM operations.. It covers everything from generating card numbers & PINs to handling the ATM transaction process.

- **Apple clone**(Frontend Project)
  Tech Stack: React js , HTML, CSS

  Developed a responsive frontend clone of the Apple website focusing on modern UIUX principle & clean component-based architecture. Implemented reusable React components & Material UI layouts to replicate Apple's minimal design, typography & spacing. Ensured responsive behavior across devices & maintained visual consistency using Material UI theming. This project strengthened understanding of React component structure, state management basics & frontend design implementation.

- Teamwork: While working as team member inside a college committees & during internship
- Time Management: While completing deadlines and managing clients during internship
- Leadership: Leading teams in various committees in college
- Communication: Interacting with clients as an design intern & College committees

language

English

Hindi

Marathi(Native)

leadership & Involvement

- **Graphic Design Lead** in CSI -2025-26
- **"Natyavihar"-Drama Club Head** in Marathi Vandmay Mandal 2025-26
- **Cultural Head** in Marathi Vandmay Mandal 2024-25
